

# Marcus Feld

## Backend / Infrastructure Engineer

(512) 555-0192 | Austin, TX | marcus.feld@example.com | linkedin.com/in/marcusfeld | github.com/mfeld

### SUMMARY

Infrastructure engineer with 5 years running production systems at container scale. Cut cloud spend 34% while doubling request volume, and owns the Kubernetes platform serving 180 microservices. Deep in Go, Rust, and observability tooling.

### SKILLS

**Languages:** Go, Rust, Python, Bash, SQL

**Orchestration:** Kubernetes, Docker, Nomad, Helm, ArgoCD, Istio

**Cloud:** AWS (EKS, EC2, S3, RDS, IAM), GCP (GKE, BigQuery), Cloudflare

**Data:** PostgreSQL, Redis, Kafka, ClickHouse, Elasticsearch

**IaC & CI/CD:** Terraform, Pulumi, GitHub Actions, Jenkins, Ansible

**Observability:** Prometheus, Grafana, OpenTelemetry, Loki, PagerDuty

**Practices:** SRE, SLO design, Chaos testing, Capacity planning, Zero-downtime deploys

### EXPERIENCE

#### Senior Infrastructure Engineer

Developer Tools Company

Apr 2022 – Present

Austin, TX

- Owns the multi-tenant Kubernetes platform hosting 180 microservices across 4 regions at 99.99% availability.
- Reduced cloud spend 34% (\$41K/month) through rightsizing, spot fleets, and a custom bin-packing scheduler, while request volume doubled.
- Built an OpenTelemetry pipeline ingesting 2.4B spans/day; cut mean incident diagnosis time from 35 to 8 minutes.
- Automated zero-downtime cluster upgrades, eliminating 12 hours of planned maintenance per quarter.

#### Site Reliability Engineer

Streaming Media Startup

Jun 2020 – Mar 2022

Remote

- Migrated 60 services from EC2 to EKS with no customer-facing downtime, cutting deploy time from 25 minutes to 90 seconds.
- Defined SLOs and error budgets across 8 teams, reducing sev-1 incidents 55% year over year.
- Wrote a Rust log shipper that replaced Fluentd, dropping per-node memory use from 900MB to 120MB.

### PROJECTS

kubecost-lite | Go, Kubernetes, Prometheus

github.com/mfeld/kubecost-lite

- Per-namespace Kubernetes cost attribution exporter; 1.4K GitHub stars, packaged as a Helm chart.

tfdrift | Rust, Terraform

2023

- Detects Terraform state drift across 200+ workspaces in under 40 seconds; runs nightly in CI.

### EDUCATION

#### B.S. in Computer Science

Texas A&M University

May 2020

College Station, TX

### CERTIFICATIONS

- Certified Kubernetes Administrator, CNCF (2023)
- AWS Certified DevOps Engineer – Professional (2022)
- HashiCorp Certified: Terraform Associate (2021)
